► Why J.N.N College of Arts & Science

J.N.N College of Arts & Science (J.N.N.C.A.S) offers an education that broadens the mind and provides liberal thinking that encourages the questioning of assumptions and reliance on facts that can be interpreted differently through different lenses. We open the doors, enabling the mind to go wherever it wants in the pursuit of knowledge and understanding. We offer a comprehensive curriculum through which students will gain strong foundational knowledge and a wide range of other courses that the students may not have exposure in a regular undergraduate program.

We aim to build a culture that places enormous emphasis on value and enables the community to derive achievements and success from this foundation, rather than by replacing it. As an institution dedicated to learning, we invest in intellectual vitality and engage with stakeholders to make a difference locally and nationally. Our contribution to this shared efforts are the unique knowledge, transformative approach and skills generated by our core activities of education and research. Our success will be visible in continued growth of our impact and reputation, and that of our region.

We attract students and faculty who are intellectually curious, independent learners, value honesty, collaboration, and are passionate about making a difference. We embrace and celebrate the beauty in differences and use these opportunities to grow, evolve and learn.

► A Distinct Liberal Arts Learning Experience

J.N.N College of Arts & Science has developed the academic programme based on building the 21st Century skills - Model of Boston Consulting Group (BCG) and World Economic Forum (WEF). To thrive in today's innovation - driven economy, workers need a different mix of skills than in the past. In addition to foundational skills like literacy and numeracy, they need competencies like collaboration, creativity and problem-solving and character qualities like persistence, curiosity and initiative.

Changes in the labour market have heightened the need for all individuals, to have these skills. In countries around the world, economies run on creativity, innovation and collaboration. Skilled jobs are more and more centred on solving unstructured problems and effectively analysing information. J.N.N.C.A.S. focuses its academics, co-curricular and extra-curricular initiatives to enhance the students' skills.
